“ Leo,
You possibly had the biggest heart and brain of anyone I've ever crossed paths with. Had it not been for you I would not have the love and passion for the things I do, of which gives my life its purpose. You opened the door to the world that became my life, particularly my love for dubstep and EDM and spinning fire. I can't express how grateful I am that you shared that part of yourself with me. I'll miss you everyday as if a part of myself is missing but you will live on through the people you touched and through me particularly in every quick witted joke I tell, every spoke I light on fire, and every drop I rage to. You were a blessing to me and a staple in my life.
Love you always
The Queen of All Everything

“ Leo, I have a non stop supply of our memories growing up with you. We did it all from building rockets on the side of the house to staying up all night playing video games and eating pizza. Walking to the mall and back and being kids. School and speech competitions, limp biscuit and the rap phase. You were a great friend and Im so fortunate to have gotten to spend the time I did with you
